

Educo Postal Requests

Personal accounts from people who have used the Educo Postal Requests System

Ovary Operation Avoided

At 42, having reared a large family, I thought to myself 'there has to be more to life than this'. I'd had a hysterectomy three years ago and I was now having more problems, constant infections. I was going to the doctor every week and taking painkillers and antibiotics constantly. I was also depressed. By this stage my doctor had sent me to hospital and as a result I was to have my ovaries removed.

The pain in my right side and down my leg was dreadful. After one month on Postal Requests the depression lifted and I started to see things more clearly. I also started to attend the centre in Eccles Street and now two months down the road I'm completely pain-free, feeling brilliant for the first time in years and I don't have to have any operation as the doctor was amazed at the improvement in me.

My life has changed course. There's meaning to it now after twenty-three years of erratic living. I feel I have just been born. It's a miracle. Mrs. Cliona Dempsey (Dublin)

Head Injuries/Coma

I wish to acknowledge a brilliant result to a request for healing that I made recently. A man I know was involved in a bad accident during a race. He was kicked in the head and had very serious life-threatening injuries. He was in hospital on a life-support machine and in a coma for three days, with no signs of improvement. I made the request one night at 9p.m. that he would make a full recovery. Two hours later he was taken off the life-support machine and was breathing by himself. A few days later he came out of the coma. He continued to make steady improvement and was allowed home about two weeks later. To me it was a miraculous recovery to health. Martin Daly (Galway)

Social Life

Recently I decided I'd like to improve my social life as I was not getting out as much as I'd like. Having used Postal Requests on many occasions with brilliant results, I very specifically wrote down what I wanted & made my request. Before I left the building someone asked me out. When I got home the phone rang with another invitation. Not only did my social life improve but my self-esteem came up a lot. My image of myself improved. It's just getting better and better all the time. Ita Fitzmahony, Artane, Dublin.

How I Get Results

Ann Kinsella in interview with Aideen Cowman.

Q. How do you get results?
A. I have made requests countless numbers of times with brilliant results. At first my requests were small, but as my faith increased I started making bigger and bigger requests. I wasn't working. I made a request and two weeks later I was offered five jobs. I was looking for the right type of people to share my new house and again the right people showed up.

Not only do I get results for myself but also for my family and friends. Some of those results are wonderful.

Q. Give me some examples.
A. A friend of mine had a very difficult pregnancy. The odds were stacked very much against the child surviving. I put in a request for the perfect outcome and that's what happened. The little girl is two now and doing brilliantly.

Q. You are a social worker. Do you use this system to help you in your work?

A. Yes - The results are holistic really. I notice I get results with lots of things at the same time. I see the results of other therapies all the time. I find those results are slow and limited and sometimes have the reverse effect.

Your Educo Postal Request Team: Tony Quinn and Aideen Cowman.

We will work on your requests with you

Educo teaches people to bring their full potential to bear on what they want. This involves filling the mind with thoughts/images of the desired results to the total exclusion of any opposing thought or inner doubt. This mind over thought approach is the basis of positive thinking and possibly even of successful prayer.

Certainly it would appear to be the secret of success. When we involve the full power of the human mind going in one direction with no opposition, the results can appear almost magical.

Tony Quinn (the originator of the Educo system) in conjunction with Aideen Cowman has worked with a great number of people on their requests using this system with excellent results, a few examples of which are presented here.

Educo Postal Requests allow you to make a request for yourself of another for success, healing, self or life-improvement. Working with a photograph of the person on a daily basis, we use the Educo system. This can take place without us and the person meeting and can be conducted by post. In this way we can work together for a successful outcome.

Our purpose is to encourage people to use the Educo approach for a better life, so on receiving your request we will send you further information on the mechanics of the system which we have found to aid results and will enable us to work together better.

Note: Under no circumstances are we suggesting or implying that this approach should take the place of medical advice or, where necessary, medical treatment. However, we do believe that it is a valuable addition to any form of therapy.

Business Expansion

In our previous issue we featured a letter from Kate Flanagan, beautician and owner of the Hair and Beauty Clinic in the Irish Life Mall, Abbey St. Since starting her business, Kate has used the Educo System with great results. She recently opened a second branch in Liffey Street employing a further 8 people. Obviously her clients are delighted with her holistic approach to beauty therapy which incorporates nutrition and Ki Massage. Great Results for My Father

Phyllis Farrell tells in interview how the Educo Postal Request System has worked for her.

Q. Phyllis, you included your father on the Postal Requests system at a time when he was not well. Could you tell me about it?

A. Yes. Last July he was seriously ill in hospital. He had been diagnosed with a serious bowel complaint and at the time it was so bad we were told he had only 48 hours to live.

Q. How old is your father?
A. He was seventy-nine at the time so you can imagine how concerned we were for him. His legs were so swollen that he couldn't walk and the pain was so intense he was on morphine. He says himself that he had lost the will to live.

Q. How long did it take before you noticed an improvement with him?

A. Straight away - his strength started to come back. I actually brought him home from hospital. His will to live came back better than ever before.

Q. Tell me more about those changes.

A. Well, he's up in the morning now and out all day on the Dart visiting places and people. It's incredible to look back at the man who was on loads of inhalers and on 28 tablets a day plus morphine injections, to the man who celebrated his 80th birthday living life again in a new way. He sure surprised a few people. He has even started writing stories now.

Phyllis Farrell - Dublin

Bowel Disorder

Just to let you know of an excellent result brought about by the Postal Requests. About a month ago I put my brother and his wife and family on the requests. Their youngest child, aged fourteen months, had been sick for months with bowel problems, constipation, not eating, surgical procedures to stretch the bowel, losing weight, very whiny, sitting in his father's arms all day and looking like a starving child from the third world.

I saw him again three weeks later and you would not believe that it was the same child. He was down on the floor flying around getting into all kinds of mischief. He polished off his 2nd or 3rd bottle of the afternoon. He looked a huge amount better. The sunken look was gone from his face and I could not get over how heavy he was. His mother has started up a walking group and goes walking every day and has also lost a lot of excess weight. My brother was a huge amount more relaxed.

It was a transformation and another brilliant success for the good guys. Donal (North Co. Dublin)

Eye Complaint

My sister got a shock a couple of weeks ago when she woke up to find that she couldn't see through one of her eyes. She went straight to hospital for tests which ended negatively.

The doctors wanted to inject her eye three times. There was also a risk that the infection would spread to the other eye as it had done in previous cases. All my family and friends were worried sick.

I decided to put her on Postal Requests. Straight away the eye started improving. The doctors couldn't understand how the eye had improved so much after only one injection. They decided not to go ahead with the rest of the treatment and they sent her home with just eye drops. She started seeing again with the eye. She has been making steady progress ever since.

I want to express my sincere gratitude to the postal request team.

R. (Dublin)
