Hailed as the world's most advanced antioxidant formulation

As seen on BBC TV documentary on Life Extension and Aging

Agrowing number of scientific research studies are showing that a powerful group of nutrients known as antioxidants appear to slow the aging process, while offering protection against many age related degenerative illnesses. These include heart disease, cancer, brain and immune system damage, arthritis even wrinkles.

Antioxidants have a protective effect on health because they reduce the number of free radicals in the body. As their name suggests, free radicals act like destructive terrorists in the body attacking healthy cells, making them more vulnerable to disease and causing them to age They also work against the immune system and play a role in age related illnesses. Three of the most significant sources of free radicals are the fat in our diets (particularly vegetable oils) the action of sunlight on our skin, and radiation.

Have you ever seen a plastic bottle that has become dried up and brittle from lying out in the sun. The same thing happens over time to the collagen in our bodies as a result of free radicals.

Free radicals attack healthy cells making in vulnerable to illness and armo

Free radical scavengers

Antioxidants protect against this type of damage by acting as free radical scavengers. They change free radicals into harmless substances and in this way may offer protection to all of our tissues.

While antioxidants are abundant in fruit, vegetables and other foods they occur in levels too low to make a real difference

Designer products

Nutritional Science has made revolutionary progress in recent years and now we are seeing

high-tech specially designed products to meet specific needs. Now for the first time we are introducing such products into Ireland

Life Extension Mix has been formulated to provide the most powerful combination of known antioxidants

In a recent BBC T.V. documentary programme on life extension and aging some experts in the field suggested it was the most advanced product of its kind on the market today. It has the added benefit of combining a number of powerful antioxidants together so that they work in synergy and enhance each other's effect.

> One of my secrets of Life-Long Fitness is to take antioxidants. I believe that Life Extension mix is the best form of antioxidant available.
