

Develop A

Develop a healthy colour all-year-round

while safeguarding your health.

If you have ever wished for a golden tan all year round - then these capsules may be the answer. Beta-Gold is a natural supplement extracted from plants. When used for over two weeks it can cause the skin to turn a light golden colour. These capsules may also be used with sunbathing or sunbeds.

WE HAVE FOUND

BETA-GOLD capsules an ideal natural aid to a healthy tan which will obtain good results for many of those who use them.

SKIN PROTECTION:

Research indicates 3 capsules daily may help to give some protection against U.V. skin damage.

TOTALLY NATURAL

BETA GOLD IS 100% NATURAL EXTRACTED FROM PLANTS. WE DO NOT RECOMMEND SYNTHETIC BETA-CAROTENE. DO NOT CONFUSE BETA GOLD WITH A SYNTHETIC TANNING CAPSULE THAT WAS AVAILABLE IN RECENT YEARS.

OTHER HEALTH BENEFITS

Beta-Gold also contains provitamin A, a useful nutrient which your body converts to Vitamin A - but only in the amount it requires, so you can't take too much. Large-scale studies seem to prove that this provitamin may actually help protect the body against disease.

FAIR SKIN AND TANNING

Most fair-skinned people who find it difficult to develop a suntan may be lacking in melanin. Melanin is your body's natural brown pigment which the skin uses to protect itself from sunlight. A body that contains ample melanin will generally produce a much deeper tan.

This pigment is said to be produced by using two of the body's natural ingredients:

1. L-Tyrosine, an amino acid.
2. Copper, a mineral.

Naturally, the more of these ingredients in the correct amounts within the body the easier it is to produce melanin. It would seem that by taking these nutrients the body's ability to produce melanin may be enhanced. Can be used by all skin types.

Tyrosine and Copper are now available in tablet form as Ultra Bronze Capsules.

These tanning supplements can work well, for many of us, producing a far deeper and safer tan than normal.

Many redheads and fair-skinned people who have never had a tan in their lives were able to achieve a colour for the very first time by using our products. Everyone did not achieve the depth of tan of a naturally dark-skinned person, but allowing for their genetic background (which is generally lacking in melanin) the results were very positive.

Beta-Gold and Ultra-Bronze are only available from
