

Develop A Healthy Tan

Develop a healthy colour all-year-round

If you have ever wished for a golden tan all year round - then these capsules may be the answer. Beta-Gold is a natural supplement extracted from plants. When used for over two weeks it can cause the skin to turn a light golden colour. These capsules may also be used with sunbathing or sunbeds.

WE HAVE FOUND

BETA-GOLD provides an ideal natural aid to a healthy tan which will obtain good results for many of those who use them.

SKIN PROTECTION:

Research indicates 3 capsules daily may help to give some protection against U.V. skin damage.

OTHER HEALTH BENEFITS

Beta-Gold also contains provitamin A, a useful nutrient which your body converts to Vitamin A - but only in the amount it requires, so you can't take too much. Large-scale studies seem to prove that this provitamin may actually help protect the body against disease.

TOTALLY NATURAL

BETA GOLD IS 100% NATURAL. EXTRACTED FROM PLANTS. WE DO NOT RECOMMEND SYNTHETIC BETA-CAROTENE. DO NOT CONFUSE BETA GOLD WITH A SYNTHETIC TANNING CAPSULE THAT WAS AVAILABLE IN RECENT YEARS.

HEALTH SAFEGUARD

Free radicals are, like their name suggests, little terrorists that go around snatching electrons from healthy cells causing cellular damage which leads to wrinkling, loss of elasticity i.e. premature ageing.

The good news however is that we can help the body dispose of its free radicals. Certain foods, vitamins and minerals seem to combat or destroy these scavengers. Amongst these are Vitamin C, Vitamin E, Selenium and the form of Provitamin A as found in Beta-Gold. This is why it may help safeguard your health while allowing you to tan.

ULTRA BRONZE MAY HELP TO MAKE THE VITAL DIFFERENCE TO YOUR SUNTAN

The use of food supplements as tanning aids has become quite popular in recent years. Fair-skinned Irish people, because of their Celtic background, and in contrast to their Mediterranean cousins, may lack melanin. Melanin is your body's brown pigment which the skin uses to protect itself from sunlight. Many health conscious sun-seekers now believe that taking the nutrient tyrosine and the trace mineral copper may enhance the body's ability to produce melanin. Tyrosine and copper are now available in capsule form as Ultra-Bronze.

Many redheads and fair-skinned people who have never had a tan in their lives have been able to achieve a colour for the very first time by using these products while sunbathing. But darker-skinned people who wish to make the most of their time in the sun may also use Ultra-Bronze. Two capsules per day is recommended commencing at least 3 days prior to sunbathing - a two to three week course is preferable.

YOUR DEEPEST EVER TAN - WITH MINIMUM SUN:

By combining Ultra-Bronze with our natural carotenoid product Beta-Gold and adding a little sun exposure, we believe you may develop your best suntan ever.

Ultra Bronze capsules are recommended for use with sunbathing or sun-beds.
